

Education

University of Pittsburgh,
Honors College, School of Computing and Information
Bachelor of Philosophy (BPhil) in Data Science, *Specialization in Data Analytics*
Thesis: “ ”
Faculty Mentor: Dr. Yu-Ru Lin
Computer Science Minor, Theater Arts Minor

summa cum laude - April 2026

David C. Frederick, *Honors Distinction*

Neapolis University Pafos, Cyprus - May 2025 Study Abroad Program
Taylor Allderdice High School, Pittsburgh, PA - 2022 / *Valedictorian*

Research Interest

Undergraduate researcher with an interdisciplinary technical background completing a BPhil thesis, seeking graduate admission with CMU to pursue research and higher education to become a future leader in HCI.

Research Experience

BPhil Thesis, University of Pittsburgh 2025–Present
• Honors research degree requiring an independent graduate level thesis defense before faculty committee.
Research Assistant, PICSO Lab 2025–Present
• Analyzed NLP data analysis and visualized

Internships

Data Scientist, Latitude AI 2025–Present
• Ford Subdivision that designs Automatic Driving Cars
• Designed and engineered data pipeline to notify the car where there is road construction
UX/UI Designer, Osher Lifelong Learning Institute 2025–Present
• Website redesign for accessibility for blind people
• Research with users about their experience with the website to focus on accessible design

Leadership Experience

Appointed Student Representative, Academic Council, School of Computing and Information 2025–Present
• Appointed by the Dean to represent undergraduate students in school-wide curricular decision-making.
• Participated in monthly meetings to review and vote on changes to degree requirements, student spaces, etc.
• Created Survey to gather data on the student body about opinions on academic programs, and admissions policies
Mentor, Computer Science Club, University of Pittsburgh
• Mentored 3 undergraduates
Mentor, Women in Computer Science Club, University of Pittsburgh 2025–Present
• Mentored 2 undergraduate students through 1:1 meetings to support academic success, and career exploration.
• Fostered confidence and retention of women in tech by sharing resources and facilitating networking opportunities.
• Specialty support in Mathematical Statistics and Algorithms and Data Structures courses

Teaching Experience

Program Director, YMCA Camp Kon-O-Kwee Spencer 2021-2025
• Directed experiential learning programs for 560+ participants.
• Mentored and evaluated a team of 15 staff, emphasizing skill development, iterative performance feedback.

- Partnered with healthcare professionals to co-develop accessible camp experiences for children with Hemophilia and Charcot-Marie-Tooth, incorporating accessibility principles into educational design.

Extended Day Counselor, St. Edmund's Academy	2023-Present
● Independently facilitated structured after-school learning for 40+ students ● Acted as primary educator in the absence of teachers, supported behavioral needs across a diverse student population	

Selected Projects	
Team Leader, Wireless Innovation Hackathon for Accessibility	2025
● First Place Winner of \$1,500 ●	
Pitt Challenge Hackathon	2023
● Developed "No Nurses Left Behind," a social media platform aimed at combating medical professional burnout. ● Integrated an AI chatbot using Python to provide real-time emotional support. ● Winner of GoDaddy Register Prize	
Automated Program Zone Form	2025
● Designed a rule-based scheduling system in Google Sheets using formulas, and conditional logic. ● Automated the assignment of 200+ campers to activities, reducing administrative workload by 10+ hours per week. ● Identified large program inefficiency and improved fairness by systematically balancing camper preferences and staff capacity.	
Three Rivers Auto Data Science Consultant Final Project	2025
● Conducted full analysis of 1,800+ historical car listings to identify key factors influencing used car prices, acting as Data Science consultant. ● Built and compared multiple predictive models, including Linear Regression, Ridge, Lasso, Random Forests, GAM. ● Delivered technical and non-technical reports, translating statistical findings into actionable pricing insights for business decision-makers.	
Prevalence of Heavy Drinking Survey Study	2025
● Developed a questionnaire covering demographics, alcohol use, consequences, and perceptions. ● Designed a cluster sampling method across 10 randomly selected fraternities/sororities ● Created plans to minimize non-response bias (reminders, incentives, weighting) and control measurement error.	

Awards & Scholarships: Academic Merit Scholarship	2022-Present
Pittsburgh Public Scholar	2022-Present
Dean’s List - School of Computing and Information	2023-Present
Portrait Master Award - La Roche College	2022

Skills: Programming Languages: R, Java, HTML, Markdown, Python, Mips, SQL
Tools & Environments: RStudio, Visual Studio, Git, Jupyter, Mars, Figma, Logism
Data Science Tools: tidyverse, ggplot2, caret, Pandas, Matplotlib

Extracurriculars:
Tech for Good (<i>Founding Member</i>), Recreational Climbing Club, Chabad at Pitt
2025 Pittsburgh TechFest
Certifications: <i>Programming Foundations with JavaScript, HTML, and CSS</i> (Duke University, Coursera)
